WANG L 93.09.17 93CN-117488

S05 (94.07.20) A61N 2/12, A61II 23/02

The device comprises a face cover, permanent magnet, power supply, and a fixing ribbon of the face cover. In the face cover, permanent magnets are set on positions corresponding to usual acupuncture points for face cosmetology.

Mechanical vibration of face cover is conducted by powder supply.

By joint action on acupuncture points of face by pulsation magnetic field and mechanical massage, improvement in looks is achieved. (Dwg.No.1/1)
